"Happy"

Visit "[Happy](#)" on MotoLyrics.com

When I'm with my friends my troubles end

I'm one of the boys, so self employed

When we're together, could last forever

And I'm almost there

I'm away from the boss, at least for awhile

I'm away from the girls that cramp my style

I'm away from the jerks, I'm away from the works

And I'm almost there, I'm almost there

And it's happy time, happy, happy time

It's happy time, happy time, happy time

Got a happy head, so happy, happy time

I wish I could be this happy all the time

I'll take one of those, and four of those

And more of those, and more of those

I'm away from the jerks, I'm away from the works

And I'm almost there, I'm almost there
