Woman you can make it right
You do it right on time

I see them men them gwaan up to that war
Them fightin till the last of them ist gone
Bloodshed in their eyes
Murder death and lies

Woman you must make it
Yes you have to make it
You gotta make them change their minds
And end it
Take your man by the hand
And make him overstand

Your love is mighty
Much stronger than a gun
And when you're smilin
Them lie their weapons down

Woman you can make it right
You do it right on time

Man is a blind and a man is a fool
He waan all the people to live by his rule
Hate is in his eyes
Murder death and lies

Woman you must make it
Yes you have to make it
You gotta make them change their minds
And end it
Take your man by the hand
And take him on your way

Your love is mighty
Much stronger than a gun
And when you're smilin
Them lie their weapons down
