Emotions, explosions late at night  
We met here, to make love not to fight  
Put my hand softly where you want it to hit  
Understand, I act when you respond

I'm patient, embrace me whisper "stop"  
So gentle and wild when you're on top  
Take your time, we know it's just a game  
What a crime, it ended when we came

No don't cry, I have to go  
I have to go, please don't cry  
Say goodbye, and don't say no  
Please don't say no, say goodbye

It makes me glad to please you  
So just tell me what you need  
It makes me glad to please you  
So just tell me what you need

No don't cry

No don't cry, I have to go  
I have to go, please don't cry  
Say goodbye, and don't say no  
Please don't say no, say goodbye

Don't you cry, I have to go  
I have to go, please don't cry  
Say goodbye, and don't say no  
Please don't say no, say goodbye

Don't say no, say goodbye  
Say goodbye

Meet me here, tomorrow the sametime
