Verse 1:

It's the middle of the night and I'm still up,
contemplating wondering if I should give up,
Life is getting heavy hard for me to lift up,
Stressing me out, it's hard to keep my head up,
But I aint giving in today, there's gotta be a better way,
gotta be a better way to play the game before it plays
us the same,
I know let's get away and let gravity decay,
And float on my friends!

Hook

"Float on my friends (repeated), when life's doing ya
so wrong, don't forget to hold on and float on my
friends"

Verse 2:

I'm floating like extra terrestrial beings
Cause somethings in life just like messin wit me,
paychecks are spent before getting to me,
A student of life but these lessons aint free.
I need a moment of clarity, no matter where it be,
Come and share with me, musical therapy,
Use it to carry me, my weightless remedy...

I'm just trying to give you something you can ride to,
something that remind you, the things that inspire you,
just a knot at the end of the rope you trying to hold on,
hopefully this song helps you float on,
And float passed all the things that's irrelevant,
Go have a good time just for the hell of it,
Drink one, smoke two, stay positive like a proton,
No prob

Hook

"Float on my friends (repeated), when life's doing ya
so wrong, don't forget to hold on and float on my
friends"

Verse 3:

Pandemonium and chaos,
I could really use a day off,
Good thing I got laid off,
Back stuck in the same spot,
Now I'm looking for a way out,
Sick of waiting for the pay off,
But for no I'm bout to take off,
And float on my friends...

I got my space boots on,
Shooting for the moon,
Target been locked hope I get there soon,
Detours roadblocks speed bumps,
Got my knees up, but this life wont ease up,
I need to re-up, hey Mona Lisa,
Can you keep an eye on your boy when their checking
my visa?
Make sure I get trthough, make sure I'm good,
A message to the misunderstood!

Hook

"Float on my friends (repeated), when life's doing ya
so wrong, don't forget to hold on and float on my
friends"
