Should have been more than good, but it makes you prideful
seems you know just what you need

Uncertainty is here, but somehow sure you'll falter, the
memory instead, guides your hand to the knife.

Should have been more than good, but it makes you prideful
seems you know just what you need

Always wasting time by asking for answers that you know you
can find yourself, but you will find home/hope when you want
it to be there - just remember all the hands you've held and
then released.

Should have been more than good, but it makes you prideful
seems you know just what you need

Submitter's comments:Â

I would really love to have someone translate this into another language.
