If I was all Grown up would I have found you
The I did when I was just a kid
We could go too far let it get to us
Come out all bruised and feeling used

It's only temporary, something to get me by
Those things that make me cry, wash away
Tomorrow

The room gets dark and the lights come up
I feel whole again, I don't want it to end
Throw my heart out there
It's burning hot and flying through the
Atmosphere

I want to do what makes me feel good and I
Know I should
I don't need much in my pockets
I don't need much at all

Don't burn it out, don't blow it out
I want that flame to burn all night
Will you watch my back if I watch yours
We'll find our way through open doors

Let's let the wind in, let it blow around
This town couldn't fly away all on it's own
