Summer beach and the empty streets
We run naked down the dock in the moonlight
So hot you could cut the air with a knife
And our hearts shine so bright
When we're all love bright

Sweet one, you put up a fight
Showin' those teeth to a lonely beast
What a sad sight oh
What a sad sight oh
What a sad sad sight oh
What a sad sad sight

That'll all walk... in the early hours of the morning
It turned me inside out
Made me want to shout
But you held me close like a real good friend
And it was strange to think I prepared for the end

And our hearts (our hearts) shine so bright
When we're all love bright
And our hearts (our hearts) shine so bright
When we're all love bright
And our hearts (our hearts) shine so bright
When we're all love bright
