The Echoes of my past won't let me Lie.  
The Echoes of these words bring back a fight.

I tell my heart to wait a night.  
I tell my heart to leave on a light.  
Incase she comes home.

I heard you say we're done.  
But In my head we had just begun.

So take away these black clouds that are hovering over  
me.  
Please take away the echoes of the words I don't want  
to hear.

So take away these black clouds that are hovering over  
me.  
Please take away the echoes of the words I don't want  
to hear.
