Shine on, my little star.
I know what you are.
Time is on your side
So shine on in the night.
How much longer must I wait
Until I cast my shell away?
And I spread my golden wings and I fly away?
We'll be flyin', baby.
Somewhere, there's a whole in the sky
Where angels fly and slide down rainbows.
Somewhere, there's a place for us
That has no cross nor bridges.
Shine on, our little star.
I can see you from here or Mars.
Like stones all in line
We'll solve the mystery of space and time.
So climb on...infinity!
