You and I stood on separate sides  
If we get too close we'd only hide  
Any other way but face to face  
And I'd be willin' to give you all  
So take a little you don't have to fall  
If you want the fruits, you'll have to taste

Chorus:

Surrender, so I can give you my love  
Surrender, I don't wanna be the one  
Tuggin' on an empty sleeve  
I can't stop 'cause all I need girl is you

Now everybody knows I'm stuck on you  
So what's with all these games that we go through  
You can take your time and watch me walk away

[Chorus]

Don't ya see I been riding out the tide  
Patient right from the start  
But all this waiting's like an arrow in my side  
Look at me, can't you see my heart  
Beat, beat, beat, beating for

[Chorus]

I could be the one that you've waited for  
But you'll never know once I shut the door  
I'm gonna make my move, don't let me walk away

[Chorus]
