What could one possibly say
To someone who ignores his way
Who's never been touched by grace
How could one eventually express
All the tension, all the stress
That can't be read on his face
All the people that one met
All the people that one left
They enrich, they develop
What one's got to reach the top
Being a sum of experiences
Knowing details makes differences

Tune your mind to the right channel
Things get played at a higher scale
Go memorize the frequency
Isn't it phenomenal?
Don't you think it's magical?
The electric storm of ecstasy

Ride the wind, take on your destiny
You gotta get much higher
Fly your flight, get over society
The world is by far much bigger

Nothing is impossible
Nothing is unreachable

Tune your mind to the right channel
Things get played at a higher scale
Go memorize the frequency
Isn't it phenomenal?
Don't you think it's magical?
This electric storm of ecstasy

Fear's got no place around here
What we see, what we hear
Format our comprehension
The un-thought, things we ignore
All the pluses and all the more
Wait to reach our perception

Spread your conscience to other territory
Your vision's gonna get much clearer
When the hunt is over parts meet in sympathy
World peace is getting nearer...
Spread your conscience to other territory
Your vision's gonna get much clearer
When the hunt is over parts meet in sympathy
World peace is getting nearer...

Nothing is impossible
Nothing is unreachable

What could one possibly say
To someone who ignores his way
Who's never been touched by grace
How could one eventually express
All the tension, all the stress
That can't be read on his face
All the people that one met
All the people that one left
They enrich, they develop
What one's got to reach the top
Being a sum of experiences
Giving life consistence
Knowing details makes differences
Entering a heart of existence

Ride the wind, take on your destiny
You gotta get much higher
Fly your flight, get over society
The world is by far much bigger

Nothing is impossible
Nothing is unreachable
So...
