Yeah x3
Seize the moment
Attempted fates
Step up the cold dark into you
So many boys who wanna holla
And you better make you're move

Tick tock tick tock you're on the clock
Say it fess up come on now what

What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait

What makes you think that you're so different
Win me over make me believe you
Get away with a whole lot don't ya
Get away with me
Get away x3 with me

Can't get mad at me for playing truth
But you just can't fight chemistry
Straight ahead boy eyes on me
Cause time I look another way

Tick tock tick tock you're on my clock
Don't you don't you will you wont you

What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait

What makes you think that you're so different

Win me over make me believe you
Get away with a whole lot don't ya
Get away with me
Don't you baby

Dissipating what you're going through
Easy prediction
I'll be waiting patiently for you
No resistance no
Oh so
Hey
Get away with me

What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait

What makes you think that you're so different
Win me over make me believe you
Get away with a whole lot don't ya
Get away with me

What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait

What makes you think that you're so different
Win me over make me believe you
Get away with a whole lot don't ya
Get away with me
