[Hook:]

I got the car gassed up and I'm ready to roll
Let's blow this town
I just need to know if you're down to go
Then let's blow this town
And we can ride out, ride out, ride out
We can ride out, ride out, ride out

[Verse 1:]

I don't wanna be here so tonight I'm about to leave
Feeling like this is my moment, wonder what I'm about
to see
Throw my suitcase out the door, turn around and grab
my key
Cause the world is unexplored but it's calling out to me
Driving 60 in a 50, I can finally feel the breeze
I'm just cruising down the road in the shade from the
trees
While I'm looking at the girls who are looking back at
me
It's hard to say I had a moment where I felt more free
I'm leaving and the road it seems so endless
And we can ride off into the sunset and I...
I can take you out them slippers baby, put you in some
heels
You'll be in front of the rest, I'll be right behind the
wheel
Driving where you wanna honey, we can make a deal
We can cruise real slow, or we'll let the tires peel.

[Hook:]

I got the car gassed up and I'm ready to roll
Let's blow this town
I just need to know if you're down to go
Then let's blow this town
And we can ride out, ride out, ride out
We can ride out, ride out, ride out

[Verse 2:]

I'm leaving and the road it seems so endless
And we can ride off into the sunset and I...

I got my house shoes on, but I ain't nowhere close
Shades on my face and I'm headed for the coast
A toast to me living like I'm supposed to be
Hoping we drown our worries in the open sea
Put your cups up and let's toast to the good life
Moon lit night, good drinks on ice
Watch your eyes bright up
Tell me don't sound like it's outta sight?
Damn right, and we might get a little bit crazy
But oh well, you can tell that I'm feeling you baby
If that's what your after, love and laughter
Then put your number in my phone and I'll call you
after...

[Hook:]

I got the car gassed up and I'm ready to roll
Let's blow this town
I just need to know if you're down to go
Then let's blow this town
And we can ride out, ride out, ride out
We can ride out, ride out, ride out
