the might is right by Machiavel
I don't see the flame of love in your eyes
Tell me why you are as cold as ice
The way your silence turns around and round
Makes me feel that something's going on

It's all right, even if the might is right
We will take the life so easy
The hope will light our days

It's all right, even if the might is right There is
no more fight left in me
So we can go our way

Now this life turns you upside down
In this swirl you are not all alone
So now one of us must go on before
We don't have the same dreams anymore

It's all right, even if the might is right
We will take the life so easy
The hope will light our days

It's all right, even if the might is right
There is no more fight left in me
So we can go our way

All the memories now are gone
No regrets at all, the damage is done

It's all right, even if the might is right
We will take the life so easy
The hope will light our days

It's all right, even if the might is right
There is no more fight left in me
So we can go our way
