Thinking back to the feeling that I had  
When I saw first your face  
I knew that it was you  
Some time has pass  
And the feelings that I had before  
Still are the same  
Cause you never changed, no  
Even though I don't show it girl  
I just want you to know

That even if we fight a million times over little things  
We can still make it better  
I meant what I said when I gave you that promise ring  
I'm a love you forever  
Fall for you deeper everyday  
Feel it now girl more than ever  
But with our type of love  
Forever ain't enough

I've been searching my whole life  
I'm lucky I found you  
Now that I got you, you ain't leaving girl  
Forever ain't enough

You see me for who I am  
Not for who I'm not, no  
I'm telling you that I'm sorry  
If I tend treat you the wrong way  
But I care, you know my heart is there  
Even though I don't show it girl  
I just want you to know  
That even if we fight

That even if we fight a million times over little things  
We can still make it better  
I meant what I said when I gave you that promise ring  
I'm a love you forever  
Fall for you deeper everyday  
Feel it now girl more than ever  
But with our type of love  
Forever ain't enough

I've been searching my whole life  
I'm lucky I found you  
Now that I got you, you ain't leaving girl  
Forever ain't enough [x5]

That even if we fight a million times over little things  
We can still make it better  
I meant what I said when I gave you that promise ring  
I'm a love you forever  
Fall for you deeper everyday  
Feel it now girl more than ever  
But with our type of love  
Forever ain't enough

Wanna fly through the blue lake  
On a bar on with you  
Getting lost in the waves  
Let the world slip awa-ay

When nobody can find us  
I don't wanna be saved  
Leave it all behind us  
Make an escape  
Tell mee what am I feeling  
Oh it's hard to explain  
Like underwater breathing  
Swimming in rain

Wanna go to the end  
Wanna dive in again  
Here we are,  
Face to face  
All alone in this place  
It's finally coming down to you and me
