I don't like the way you touch me
You hurt me once again
Something about you irritates me
Some things break before they bend

I can't remember the last time, I saw your face without
that frown
And would you believe there's people who like having
you around?
Had to be a time when there were good things on your
mind
There's got to be something in your life that's worked
out right

The only time I need you is when you've gone away
I just want somebody to talk to
I don't need you getting in my way

I can't remember the last time, I saw your face without
that frown
And would you believe there's people who like having
you around?
Had to be a time when there were good things on your
mind
There's got to be something in your life that's worked
out right

I can't remember the last time, I saw your face without
that frown
And would you believe there's people who like having
you around?
Had to be a time when there were good things on your
mind
There's got to be something in your life that's worked
out right

I can't remember the last time, I saw your face without
that frown
And would you believe there's people who like having
you around?
Had to be a time when there were good things on your
mind

There's got to be something in your life that's worked
out right
