"Missing You"

I try to give my all, to walk but still I fall
Trying every move, got me confused
That I would play the fool but you were with that other
dude
Girl , get this, I know you got missing
You will never find a way to hold you there just like
I , like I told you before
I tell you again
See girl, never find, oh, no, nobody to me
You will never find a way to hold you there just like I do
Never told you before, I tell you again
You will never find, find, another girl, no nobody to me,
no nobody to me.
