It's easy to talk bad about what other's do  
How does it feel when they talk bad about you?  
Will you fight back?  
Will you get all mad?  
You know what?  
Hey! let's just chill out

Ah...  
That's right, man  
Just be cool  
Ah...  
That's right, man  
Just be cool

You don't like what's going on around you?  
Then this is your chance to change yourself  
Can you open up?  
Can you take it easy  
You know what?  
Hey! let's just chill out

Don't need no fire, listen to the voices  
How about listening to someone else for a change

You don't like what's going on around you?  
You know what?  
Hey! let's just chill out

Ah...  
That's right, man  
Just be cool  
Ah...  
That's right, man  
Just be cool

Can you open up?  
Can you take it easy

Live it up today if you want to  
Live it down tomorrow

Ah...  
That's right, man  
Just be cool  
Ah...  
That's right, man  
Just be cool

Ah...  
That's right, man  
Just be cool  
Ah...  
That's right, man  
Just be cool

Just be cool cool  
That's right, man  
Just be cool cool  
That's right, man  
Just be cool cool  
That's right, man  
Just be cool cool  
That's right, man
