I don't need nobody
No one but myself
I don't need nobody
No one but myself

You think I'm fragile
That if you tell me I will break
You think your special
Your like every guy I date

I don't need you
But you need me
And one day you will see

Chorus: Your a nobody
I don't need you
You can go with her
But you'll be back soon
I don't care if you
think my heart will break
Cause I don't need, (need, need)
Nobody (nobody, nobody, nobody)

You think that I can't
Take pain, too much inside
So you date her
And its what you try to hide

You will see soon
That I know it all
And I no longer will catch you when you begin to fall

Chorus

One day you'll open your eyes
When I'm not there, don't take it as a surprise
And I know, your missin me now

Chorus 2x until fade
