going down this road again  
I finally know  
there is no end to the good  
love is everywhere i go  
looking through you  
love is everywhere i go  
looking through you  
love is everywhere i go  
looking through you  
burning light inside my dreams  
i wake up in the dark  
the light is outside my door  
I  
love is everywhere i go  
looking through you  
love is everywhere i go  
looking through you  
love is everywhere i go  
looking through you  
chasing every fragment i see  
looking through you  
love is looking for me  
breaking open the clouds  
i'm not stranded in time  
love is everywhere i go  
looking through you  
love is everywhere i go  
looking through you  
love is everywhere i go  
looking through you
