All alone

It came unexpected
The birth of your child
Now you've been forced to provide a way
For you and your baby

Don't you go to work from nine to five
You're up at night when the baby cries
Girl I don't care why he left you
All I know is I love you and your child

I love you both, I'll turn this house into a home
I love you both, you're not in this alone
I love you both, now let me be the man he couldn't be
I love you both, girl you need to get with me

I love you both, I'll turn this house into a home
I love you both, you're not in this alone
I love you both, now let me be the man he couldn't be
I love you both, girl you only get with me

The baby has your eyes
Yeah the baby has your smile
So how can I not love you both?
I need you in my life

I'll never walk away from you
I'm here to help you see this through
What's mine is yours, what's yours is mine
Girl take it all 'cause I love you and your child

I love you both
I love you both, you're not in this alone no
I love you both, now let me be the man he couldn't be
I love you both, girl you need to get with me

I love you both, I'll turn this house into a home
I love you both, you're not in this alone
I love you both, now let me be the man he couldn't be
I love you both, girl you need to get with me

I want you to know, I love faithfully
I wanna share my life with you and your baby, hey

I love you both, if you didn't know right now I want you
to know how

I love you both, I'll turn this house into a home
I love you both, you're not in this alone
I love you both, let me be the man he couldn't be
I love you both, girl you only get with me

I love you both, I'll turn this house into a home
I love you both, you're not in this alone, oh no
I love you both, let me be the man he couldn't be
I love you both, oh ho

We're a family, yes
We're a family, I want it all
Yes, we're a family, I may be only 18 years old
We're a family, but I know about love

Yes, we're a family
We're a family, oh
Yes, we're a family
We're a family, oh

I love you both
I love you both
I love you both
I love you both
