I was on the sea, see you standing in line just to be
there
Youre looking at me,
Something bout the way I do my thang, thang
Im getting on this kill and you know
Its something I could think about
Youre just, like the wind when you blow
But baby I need it all, I need it all

In sin city with me
You dont care bout the who, when, where, how
Youre so free, tell me what to get
Whats your name, name?

Im getting on this kill and you know
Its something I could think about
Youre just, like the wind when you blow
But baby I need it all, I need it all
Im getting on this kill and you know
Its something I could think about
Youre just, like the wind when you blow
But baby I need it all, I need it all
I need it all, I need it all
I got you under my skin you know
Baby I need it all

[Guitar solo]

I want you more than I know I said
Baby I need it all
I want you more than I know I said
Baby I need it all
I want you more than I know I said
Baby I need it all
I want you more than I know I said
Baby I need it all.
