He's the man with all the toys

Someone found a lighted house  
Late one night  
And he saw through the window  
A sight

A big man in a chair  
And little tiny men everywhere

He's the man with all the toys

Well how thrilled that someone  
Must have been  
And he must have been  
Tempted to go in

He stayed out in the cold  
And when he left them he told

About the man with all the toys  
He's the man with all the toys

The man with all the toys  
He's the man with all the toys
