Newspapers read undone on the corner of the street
I'll go to memory of the place we left crying
In the day we never like try to make our way
I should have told you and I be u because you had pay
it it's mine
I still can hide it it's been here for a while and
I can now believe you're here in front of me
Cause I can read you

Right now not then
I can still remember when I'm working my way back to
you boy
I'm really gonna try

Right now not then
I can now remember when so I'm working my way back
to you boy saving your time

This time this time this time...

Now I found you work my... my shoes I got bless on you
Tell me what I'm gonna do

I can read you

Right now not then
I can still remember when I'm working my way back to
you boy I'm really gonna try

Right now not then
I can now remember when so I'm working my way back
to you boy saving your time
This time this time this time...
