"Good day fellow warriors,  
We've got a lot to do  
There is gunna be some bleeding  
And it's all for you"

The night starts to fall  
And the rain pours down  
The solders of the light  
Come into town

They will cut and slice  
Bleed your heart out right  
Make you suffer  
For all your sins

The clock begins to strike  
And screams attack the silence  
Fire begins to burn  
And death takes control

They will cut and slice  
Bleed your heart out right  
Make you suffer  
For all your sins

And when it's over there'll be nothing left  
For sins rule your life  
And with them comes death.

"So warriors together we shall rule the night  
And with bring clarity and peace"
