(Verse)

It doesn't make us strong
It doesn't make us weak
Tongue tied to service like shy pre teens
I could only breathe
Left to believe
I'm alone

It didn't come easy I'm glad it was hard
Worth the wait to give you my heart

(Chorus)

Baby teeth small kiss
I turned wax and melt like this
Not like this

(Verse)

A found you in pieces you've been torn apart
A million one reasons to end before you start
But deep down I knew
No matter what in the end, it'd be me and you

(Chorus)

Baby teeth small kiss
I turned wax and melt like this
Not like this

Never knew hate
Driven vanilla took astray you and me
We haven't made
We haven't made

(Bridge)

Charisma knees with your tongue
Teeth on my waste I come undone
It's those hours in the night just before a light

When your hand down my spine
We kiss the dust goodnight
Goodnight...

(Chorus)

Baby teeth small kiss
I turned wax and melt like this
Not like this

Never knew hate
Driven vanilla took astray you and me
We haven't made
We haven't made
