"Will You Be With Me"

Visit "[Will You Be With Me](#)" on MotoLyrics.com

I look up and there right there.
How it pierces through me.
I would be wiped out in a single blow, if you didn't love me.
I see your eyes, they let me see the true you.
A love forgotten, a love torn apart,
a love not worth time, a love badgered away.
I wouldn't let that happen to you,
We could be together forever, just let me be with you.
I'll right you sappy poetry like:
Roses are red, violets are blue,
and how nice would it be to be purple with you.
Come on just give me one chance,
I'll always be there just as sure as the sky is blue.
Girl I want to be with you.
What a thrilling chase, as I try to get to you.
I would hunt you to the ends of the universe to be with you.
We could go anywhere; spend time together as friends and romantically.
Maybe dance a little,
hold hands for just for a short time,
and then to kiss you good bye.
I would do all this for you.
What a thrilling chase, as I try to get to you.
I would hunt you to the ends of the universe to be with you.
We could go anywhere;
spend time together as friends and romantically.
Maybe dance a little,
hold hands for just for a short time,
and then to kiss you good bye.
I would do all this for you.
I get chills down my spine when I see you.
Baby I would give you all the love you need, all the attention too.
You'd be my number one, my number Uno'.
All I need is for you to say yes, and I would flip over backwards.
I would be the happiest man alive.
And when you say yes, will you be with me forever.

We could be together forever, just let me be with you.
I'll right you sappy poetry like:
Roses are red, violets are blue,
and how nice would it be to be purple with you.
Come on just give me one chance,
I'll always be there just as sure as the sky is blue.
Girl I want to be with you.

We could be together forever,
just let me be with you.
I'll right you sappy poetry like: Roses are red,
violets are blue,
and how nice would it be to be purple with you.
Come on just give me one chance,
I'll always be there just as sure as the sky is blue.
Girl I want to be with you.
Girl will you be with me, my hearts pounding,
it's throbbing.
If you just leave me;
I don't know if I could survive without you.
Girl will you be with me, will you be with me.
