Tonight we walk by the endless ocean  
Caught in the tide of a deep emotion  
I'm feeling things that I don't understand  
How I wish that you would take my hand

I try to speak but my lips are silent  
I only wish I could say what I meant  
What should be easy suddenly is so hard  
Telling you the treasure that you are

Some things come between us  
And it can not be disguised  
Are those stars or tear in your eyes?

Chorus:  
Just take me into your arms  
Hold me closer than the night  
I need to know you're beside me

Love is a powerful thing  
That can ever be denied  
In between the moon and the deep sea

What did I do? How do I deserve you?  
Can it be so? Do you feel the same?  
You must believe that I speak from my heart  
Without you my world will come apart

Some things come between us  
And it can not be disguised  
Let me dry the tears in your eyes

Chorus 3x
