Your eyes are screaming in the dark  
And I have reason to worry  
Although we're not yet apart  
Something else has faded away

[Chorus]  
Side by side  
Is not all we've got to lose  
Not when I'm getting high again on you

Everywhere I'm cold just a little long  
After you leave the sun has gone away  
And I don't like that I need you  
(but) at least now I know what I've got to do

Trip trip trippin' under moonlight  
It's so cold where we go  
And so hot tonight  
But where is the love light

[Chorus]  
Side by side  
Is not all we've got to lose  
Not when I'm getting high again on you

Take away my tears  
Take away my tears

[Chorus]  
Side by side  
Is not all we've get to lose  
Not when I'm getting high again on you
