Everybody else has gone  
But you're still here with me  
All the world is sleeping by and by  
Through the windowpane

The frosted light is streaming in  
Full moon sailing high across the sky  
Tonight is like the night when we first met  
I always knew I never would forget you

Come and hold me close  
I miss you more than I can say  
I can't remember how I pass the time  
(With you away)  
Wondering if you'll ever know

How much you mean to me  
I never dreamed there'd be a change of mind  
Lover, this is where I want to stay  
Maybe it could always be this way

I recall you said to me a long, long time ago  
"Don't you lose direction in the crowd"  
(I think you could)  
But when I did you found me and I didn't even know

I hardly even knew  
You were around and understood  
I was reaching out each moment to be free  
You were all those things I'd never be

Gentle music, rock away the sadnesses in me  
Rock away my lonely yesterdays  
Like pennies on the ocean  
'Til no trace of them I see

'Till moonlight shows no ripples on the waves  
And then the clear reflection will remain  
Perhaps the same reflection  
Of that same full moon
