Smoke in the distance  
Maybe meant to be a sign  
Maybe it's just your way of tryin sayin goodbye  
The room was tippin over but  
But my mind was standing still  
There was sunshine drippin off the window sill

Thats what it takes to make the clouds  
Thats what it takes to make the clouds  
In June, pretty baby  
In June, pretty baby  
In June, pretty baby  
In June

In June, pretty baby  
In June, pretty baby  
In June, pretty baby  
In June, Justine

I looked it up in the dictionary,  
In the dictionary of dreams  
The room was tippin over, on page 63  
The red expect a miracle, garaunteed to please  
And all the indicators, point to you, Justine

Thats what it takes to make the clouds  
Thats what it takes to make the clouds  
Thats what it takes to make the clouds  
In June pretty baby  
In June pretty baby  
In June pretty baby  
In June

In June pretty baby  
In June pretty baby  
In June pretty baby  
In June, Justine

I had to take the train  
The rain was flooding Amsterdam  
And then there was an avalanche

That covered half of France  
Back at Central Station  
There emerged a submarine  
The captain tipped her hat at me  
It was you, Justine

Thats what it takes to make the clouds  
Thats what it takes to make the clouds  
In June pretty baby  
In June pretty baby  
In June pretty baby  
In June

In June pretty baby  
In June pretty baby  
In June pretty baby  
In June, Justine

The room was tippin over  
But my mind was standin still  
There was sunshine drippin off the window sill  
So much has happened to me lately in my sleep  
Now I know in June, you'll be here, Justine

Thats what it takes to make the clouds  
Thats what it takes to make the clouds  
In June pretty baby  
In June pretty baby  
In June pretty baby  
In June

In June pretty baby  
In June pretty baby  
In June pretty baby  
In June

In June pretty baby  
In June pretty baby  
In June pretty baby  
In June

In June pretty baby  
In June pretty baby  
In June pretty baby  
In June
