Can you believe
That our world will fade into dust
But I am alright, I'm alright

Are you prepared
That all the plans I have for you
Will never come true
Never come true

Can you see our future
See our past
Maybe this will be the last
The last chance
The last chance you will get

The final days on earth have come at last
The time is flying by so very fast
The sky is glistening in an eerie grey
There's no escape and there's no other way
Forgive me now

I try to do what can't be done
Yet every creature's on the run

Can feel it's all around this place
I tried so hard but I can't be erased
I close my eyes and see the devil's grin
It seems he knows about this easy win

I try to do what can't be done
Yet every creature's on the run

I try to do what can't be done

The final days on earth have come at last
The eleventh hour has already passed
The sky is glistening in an eerie grey
There's no escape - No! - there's no other way
