Words into space
into unfair terrain
they are gone now
exited my mouth.

Words find you cold,
but actions are too bold,
oh how can we,
bridge this divide.

We;re like night and day
night and day
a bitter night
and a broken day

You'll never change
always the same.
While I move
quicker than the tides.

But yours is a face
my mind won't erase,
and I know I can't say goodbye

We're like night and day
night and day
I love the nights,
you seek the day

They are just nights and days
that we while away
just nights and days

How could we grow old together?
how could we grow old together?
we're like night and day,
we're like night and day
we were born this way
we're like night and day
like night and day

Such a lonely night
and a beautiful day.
