One and one is two
and the one for me is you
only you
It's everytime I see you
I know I have to have you
Cause baby you just drive me wild
Can't get you out of my mind
I feel like I just want to lay
So close to you that people say
The two of us are merging
Baby this is urgent
And
One and one is two
and baby the one for me is you
and now that you've learned the abc
You're ready to come inside my dreams
All I wanna do
Is show you the love you never knew
So I will sing this song to you and
Make you see one and one is two
Now listen
And when we are together
The feeling's so much better
Just you and me we'll take a ride
To get into our inside
Like deeper than the ocean's deep
Climb higher than the mountain's peak
So let us start the merging
Cause baby this is urgent
One and one is two
and baby the one for me is you
and now that you've learned the abc
You're ready to come inside my dreams
All I wanna do
Is show you the love you never knew
So I will sing this song to you and
Make you see one and one is two
Love is on my mind
Can I get you in tonight
One and one is two
Baby, baby
Up, down all around

Let us turn it inside out
One and one is two
Ohhh
One and one is two
The one for me is you
One and one is two
The one for me is you
It's everytime I see you
I know I have to have you
Cause baby you just drive me wild
Can't get you out of my mind
I feel like I just want to lay
So close to you that people say
The two of us are merging
Baby this is urgent
And
One and one is two
and baby the one for me is you
and now that you've learned the abc
You're ready to come inside my dreams
All I wanna do
Is show you the love you never knew
So I will sing this song to you and
Make you see one and one is two
Love is on my mind
Can I get you in tonight
One and one is two
Baby, baby
Up, down all around
Let us turn it inside out
One and one is two
One and one is two
and baby the one for me is you
and now that you've learned the abc
You're ready to come inside my dreams
All I wanna do
Is show you the love you never knew
So I will sing this song to you and
Make you see one and one is two
