Just want to make you smile
What is wrong with that?
Do you think we have a chance?
Do you think we just

You say to me you wanna get up
Why don't you talk to me for awhile?
Boy I am not trying to rush
I just want to make you smile
What is wrong with that?
Do you think we have a chance?
Do you think we just click
So good for a relationship?

Small town boy
I realize and know you are busy
And it's okay because I understand

You know who you are
I won't make a scene
But I care to ask you
What if it is meant to be
You know you are a star
I might make this easy
But no matter what
Whatever will be will be
If it is meant then it will be
If it is meant then it will be

You ask me why I am so much for this
I say well it you not them I like you
And if you are still wondering
I say well I won't lie just tell you the truth
Maybe I am just too foolish
Not to realize what you are doing

Small town boy

There are lies and rumors
And it's fine because I don't listen to them

You know who you are
I won't make a scene
But I care to ask you
What if it is meant to be
You know you are a star
I might make this easy
But no matter what
Whatever will be will be
If it is meant then it will be
If it is meant then it will be

Wherever your heart is
That is where you would find your treasure
Wherever the path takes you
I still want to support you

Would that still be okay?
Is this wrong, to like you
Is this wrong, to like you like this

You know who you are
I won't make a scene
But I care to ask you
What if it is meant to be
You know you are a star
I might make this easy
But no matter what
Whatever will be will be
If it is meant then it will be
If it is meant then it will be

Sing it one more time

You know who you are
I won't make a scene
But I care to ask you
What if it is meant to be
You know you are a star
I might make this easy
But no matter what
Whatever will be will be
If it is meant then it will be
If it is meant then it will be
