YOU WILL DIE!

Thousands gathered on the killing field  
Sun is setting and the air is cold  
One more breath is all you really need  
Will they ever discover you bones?

Terror - you may close your eyes  
Hatred - you may turn you head  
Dying - there will always be war  
Peace is - for - the - dead

In - to - the - dirt - joining the dead  
Lime - on - your - face - shot in the head  
One - world - perished in the flames  
It's - time - to - unveil the grave

You see - you see - your own apocalypse  
You feel - you feel - feel when they crush your skull  
You bleed - you bleed - bleed when they cut your  
throat  
You fall - you fall - this is how you die!

Fallen is our race / Forgotten and erased  
Returning to ashes / Civilised in mass graves  
One more breath is all you really need  
Will they ever discover you bones?

Terror - you may close you eses  
Hatred - you may turn you head  
Dying... Dying - there will always be war  
Fallen is our race  
Retruning to ashes / Civilised in mass graves
