I want to be alone -- Just keep the fuck away from me  
All I've done and all I've tried  
Done it by myself, no one at my side  
I want to be alone -- Don't want no friends or families  
I want to be alone  
Don't give a fuck what you think about me  
Don't talk to me, don't want to know your name  
People are shit and you're all the same  
I want to be alone -- Just keep the fuck away from me  
I want to be alone  
You can keep your love and shove it up your ass  
I want to be alone  
I'd rather stick your face with broken glass  
All my friends have moved away or died  
All the women I've trusted have always lied  
I want to be alone  
You see me on the street, just walk on by  
I want to be alone  
I'd like nothing better than to see you die  
Don't talk to me, don't want to know your name  
People are shit and you're all the same  
I want to be alone
