

S.A.S. "The Struggle"

Visit "[The Struggle](#)" on MotoLyrics.com

For years the struggle has been raging on
Workers of the world are fighting back
We must come to terms and face the facts
The real enemy is the upper class

Arise
Wake up before it's too late
Arise
Take arms and bring down the state
Arise
Don't let it all be in vain
Arise
There's a brave new world we can gain

The rich still get richer every day
But the working man will have his say
The struggle continues and will always be
The struggle won't end until we're all free

Arise
Wake up before it's too late
Arise
Take arms and bring down the state

We must be willing to sacrifice to make things right
We must be willing to put aside our differences and
unite
We must be willing to dedicate our lives to fight the
fight
We must be willing to die for the cause to make things
right
