Rise up, rise up...

Complications in the nations of this whole wide world
Inflation is reality, there's no place to turn
The poor man he knows it
'Cause is him who got to feel it
Unemployment is the cause of crime in the streets
Mental oppression, police brutality

When will it all end
This hating and killing of your brother man
When will it all end

Rise up, rise up...

Sufferation in the nations of this whole wide world
Nuclear pollution there's no place to turn
The poor man he knows it
'Cause is him who got to feel it
Unemployment is the cause of crime in the streets
Mental oppression, police brutality

When will it all end
This hating and killing of your brother man
When will it all end

Rise up today, this is what the Rasta man say
Rise up today

Rise up
