"The Fall"

Visit "[The Fall](#)" on MotoLyrics.com

My mother, the Red Arrow fly
Nosedives towards me

London is falling down
London is falling down

Shining new pylons descend to the earth
As I walk towards them skyscrapers crash down to the
ground

London is falling down, down down
London is falling down

Inside and outside what goes up comes down
London is falling down, down down down down
London is falling down

I'll take a plane or a kite I'm flying Northwards
I'm going uptown

London is falling down, down down down down
London is falling down

Inside and outside what goes up comes down
London is falling down
London is falling down
London is falling down
London is falling down
