"We Can Leave The World Behind"

Visit "[We Can Leave The World Behind](#)" on MotoLyrics.com

When you're feeling times of trouble
When you're feeling unsecured
When you're lost inside
and have nowhere to turn
When you look into the future and you writings on the
wall
It's the fear-of-falling staring at us all
And your world is not turned out to be
What you planed and come with me

We can leave the world behind
You never know what we can find
Together we can take the time and make it right
We can leave the world behind
Whatever you got on your mind
Together we can take the time and make it right

No matter what you're feeling
No matter what you need
If you believe in love then you succeed
We all have our illusions
We all have our own dreams
But there's times when life's just not what it might
seem

We can leave the world behind
You never know what we can find
Together we can take the time and make it right
We can leave the world behind
Whatever you got on your mind
Together we can take the time and make it right

And if your world is not worked out today
Then look inside yourself and find
If all your thoughts collide don't run away
Just come and leave the world behind
And if your world is not turned out to be
What your planed, then look inside
Open your eyes, reach out and you will see
Together we can make it right
Make it right, make it right, make it right

We can leave the world behind

You never know what we can find
Together we can take the time and make it right
We can leave the world behind
Whatever you got on your mind
Together we can take the time and make it right

We can leave the world behind
we can leave the world
You never know what we can find
Together we can take the time and make it right
make it right, make it right
We can leave the world behind
we can leave the
Whatever you got on your mind
on your mind
Together we can take the time and make it right
make it right, make it right
Together we can take the time and make it right
make it right, make it right
Together we can take the time and make it right
