You twist the shapes and spin the shadows tonight  
You cry yourself awake as I wait for the light  
The reds and blues come flashing  
Not for me or you, we've thrown it all away

I'm sorry, you're sorry  
But do we think the world should worry  
It's over, we're over  
A chance to part before we're older  
This heart pain burned deeper  
The more I thought of how to keep her  
It's over, we're over  
And now I've spent it all  
You're my ten dollar miracle

I wake up and appreciate all that I've got  
A battlefield living room with a hole where you're not  
The danger signs were showing  
Time to loose the chains and throw it all away

I'm sorry, you're sorry  
But do we think the world should worry  
It's over, we're over  
A chance to part before we're older  
This heart pain burned deeper  
The more I thought of how to keep her  
It's over, we're over  
And now I've spent it all  
My ten dollar miracle
