"Out And Inside"

Visit "[Out And Inside](#)" on MotoLyrics.com

Sailing on a diamond tide
Rising at the speed of light
Calling spells to hold me high
Pictures, they call at night
Visions I can't stop in my mind
Science is blowing inside out

And I'm here amazed
But I wish you came

Nowhere to hide but I've been out and inside
I stand alone over the thoughts of no one
Wherever I am, I don't need to come down
Wherever I am, I wanna lie here forever

Imaginary life
In a trip far beyond the sight
That's where you'll find me when I hide
I'll tell you what is wrong
The real thing does make you wait too long
While I here, get whatever I want

I wish you'd stay
I'll lead the way
