Yeah I know it's gone away, baby
Kids are laughing now and that's so crazy
Long ago, when we were young, baby
My mental be was meant to be, uh!

Chorus:

Uh, uh the West side story
The West side story, the West side story
Uh, uh the West side story
The West side story, the West side story

Always nice do you see her face, baby?
People talk, but they don't know that's shady!
Fighting words, fall on their fierce, baby
Sister blister, never gonna miss ya
Place your bets, no regrets
I'm Romeo and your Juliet
Flood and bone is cast away
What goes around will always come out again!

Chorus:

Uh, uh the West side story
The West side story, the West side story
Uh, uh the West side story
The West side story, the West side story

You never know what it takes to do what I do
You don't care, I don't care
What it takes to do, what you do
...miss right through my chest
You long to wait..
Call before you run!

Chorus:

Uh, uh the West side story
The West side story, the West side story
Uh, uh the West side story
The West side story, the West side story
West side story, West side story
