Temperatures rise, rising and reeling  
from feral files found in the trash can  
confirming all our deepest fears

Ooh television keeps us scared to death  
Ooh don't go outside, better stay in bed

Mold in the air might cause a car crash  
somewhere in France  
leading to outbreaks of airborne plagues  
violent earthquakes

Ooh television keeps us scared to death  
Ooh don't go outside, better stay in bed  
(Ah) Run to your momma's basement  
there ain't no air  
so you can't hear the TV singing  
soon we'll all be dead  
get up! get up! go on and see the very last sunset

Ooh television keeps us scared to death  
Ooh don't go outside, better stay in bed
