you look so tempting standing there
i notice something in your eyes.
i act on impulses alone
forgive my silence while we ride.
california.
this is something that you never saw coming.
california.
drop the blindfold while i bury my knife in you.

wrap my hands around your neck
see my grin expand
just remember that you pushed me this far.
see your color fade away
reach my hands out up to the sky
and remember that you pushed me this far.

sit back, enjoy the scenic route
out here the leaves will never fall.
lately you don't care much for me
but i never cared for you at all

take me home.
take me away from this place.
take me away from this place i don't know.
back to my home.
back to the place i call home.

wrap my hands around your neck
see my grin expand
just remember that you pushed me this far.
see your color fade away
reach my hands out up to the sky
and remember that you pushed me this far.
sun is beading on my neck
sweat drips off my hands
just remember how we made it this far.
california, here i am
nevermind who i brought along
just me happy that i made it this far.
