"Mystic Transformation"

Visit "[Mystic Transformation](#)" on MotoLyrics.com

teacher teacher do us a favour
not sure we are getting any cleverer

the kind of knowledge taught to us at school
be the death of me and the death of you
take a look at what is happening to
the children of us just look at what they do
we need a mystic transformation
to spread over our nation

trip of the time is that we're not all here
all messages collide into an oval sphere
there's something in there there's something without
dreams are reality that's what times about
all of natures not natural i love you then i don't
i'll be there when you need me but then again i won't
how did it happen? who can he be?
if life is worth living then show me

philosophy's recycled does that make it green?
does waste apply to our thoughts when we dream
lets deeds not words be your adorning
lets deeds not words be you

need a mystic transformation
to spread over our nation

everything you know is wrong i saw that on a sign
i thought that sign's clever i'll make it mine
search should be a sport in the Olympics
people shouldn't have to spend their lives jumping into
sandpits
reflection should be our conversation at times
just sit there and listen as time drifts by
there are hidden gems of knowledge stored in our
minds
and education can bring out what's inside
we can create we can administrate
we can live our lives in a film script state
it's within human power to let the force shower us
with it's bounties and blessings it's features and

lessons

i don't have to spell things out in black and white
cos it's not a jam jar storage kind of life
for the benefit of those who say i've got mine
there's something out there it's moving
it's leaving you behind

teacher teacher do us a favour
i'm not sure we are getting any cleverer
kind of knowledge taught to us at school
be the death of me and the death of you
take a look at what is happening to
the children of us just look at what they do

we need a mystic transformation
to spread over our nation

need a mystic transformation
to spread over our nation
