Inner meet me
Oh, you can't decide

Last night I dreamt somebody
Fell asleep between my knees
I couldn't help it that
The facts were rejected by a boy who called me

She said to me
Keep your head up
Never show up
Keep it all in
Never dream alone
Play on a star
Moves too far
Say what you feel
Speak when you kneel
Never dream alone
Never dream alone

If you were feeling that the light is on the ceiling
Then you can't see past your nose
'Cos what you're seeing is the man underneath the
beam
She's a fool below low
I never listen but the people, they were christened
I wonder who was the one
A better placement for the basement when he's
chasing
Mrs Mason when they're facing on the relation
