[Verse 1]

I look at myself I see what I've become
I'm but a shadow of who I'm to be
Can't let myself go wrong, all the decisions I make
Won't take my virtue and prospects from me
I know I'm strong, I can reach my goals
I'm a voice that the world needs to hear
With my heavenly guidance and courage I'm granted
The path up ahead now seems clear

[Chorus]

Reach on out for love
Dreaming of fears to be conquered
Never ending love
Something this world could use more of
Reach on out for love
Fill your heart with laughter
It may sometimes feel like it's all in vain
It's happiness that we're all after

[Verse 2]

My sun still has not set
There's still lots of time yet
To make the changes in life that I seek
The potential we have and how we use it to win
Can be the cure for the passive and weak
Destined for greatness increasing awareness
Aspiring to be something more
Working together and loving each other
This is what mankind was made for

[Chorus]

Reach on out for love
Dreaming of fears to be conquered
Never ending love
Something this world could use more of
Reach on out for love
Fill your heart with laughter
It may sometimes feel like it's all in vain
It's happiness that we're all after

[Bridge]

We've got to find a way to
Lose the complications in our lives
And go beyond familiar situations
Exercise your right to trust each other with no
inhibitions
To better you, to better me
So take your heart and reach...

[Chorus]

Reach on out for love
Dreaming of fears to be conquered
Never ending love
Something this world could use more of
Reach on out for love
Fill your heart with laughter
It may sometimes feel like it's all in vain
It's happiness that we're all after
