We've done a lot of things we can't take back
But you can't take that so hard
We'll drive all night and we just won't look back
We can take your daddy's car

Out on the desert when the stars come out
All the cars fly by like rain
I'll let you show me what you're all about
And you won't have to explain

Don't cry, honey I'm right here
I'll be the one who you can lay in the sun with
When it comes out, here it comes now
Here it comes, dear

We'll catch a plane to somewhere far away
And we'll hide away for good
I'll change my clothes and you can change your name
We'll pick out one that sounds good

How 'bout Diana how 'bout Clementine
We'll have all the time we need
Just close your eyes and let the scene go by
Have your passenger seat dream
